LAWN GRASS SEED

WOODGRO SPECIAL BENT MIXTURE

Through many years of careful testing we have developed a super mixture of grasses, mostly Bent varieties, which will produce a smooth, velvety lawn resistant to drought and hard wear. The seed has been chosen for its freedom from dirt and weeds, its high vitality, and trueness to type. A good lawn cannot be made from light-weight chaffy seed or seed mixed with dirt and foreign matter. Only the most carefully chosen stock, cleaned, re-cleaned, and tested, can be depended on for success.

Each package of Lawn Grass Seed contains detailed instructions for preparing the ground, sowing, fertilizing, and after care of new lawns, and reliable directions for improving an old one.

WOODGRO LAWN GRASS SEED

Woodgro Choice Mixture

In this Mixture the quantities of some of the more expensive grasses are reduced or left out. Produces a thick turf, well adapted to hard usage. Weighs over 20 pounds to the bushel. lb 50c., 2lb 95 cts.,
5 lb \$2.00, 10 lb \$3.75, 20 lb \$7.00, 100 lb \$34.00

Woodgro Mixture for Shady Places

There are always spots under trees and in the shadow of buildings where the sun-loving grasses will not grow. For places of this kind we have prepared a careful Mixture of those grasses which naturally thrive in the shade. This Mixture consists of the highest grade of re-cleaned seeds, and should produce a good lawn in difficult shady places.

lb 65 cts., 2 lb \$1.25,
5 lb \$3.00, 10 lb \$5.50, 20 lb \$10.50, 100 lb \$50.00.

Sunny Spot Mixture

This mixture will meet the requirements of those desiring to maintain a lawn at low cost. It is a good clean mixture of high quality and strong germination.

lb 35 cts., 5 lb \$1.65, 10 lb \$3.00, 100 lb \$28.00.

Woodgro Terrace Mixture

This is a special mixture of grasses best suited for sowing on terraces and side-hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out, that will withstand drought and exposure, thrive on shallow soils and at the same time produce a rich green turf throughout the season.

lb 65 cts., 5 lb \$3.00, 20 lb \$11.00, 100 lb \$50.00.

Woodgro Seashore Lawn Grass Seed

A special mixture of grasses peculiarly suited for seashore lawns, composed of strong-rooted varieties which will quickly produce a good turf.

lb 60 cts., 5 lb \$2.75, 20 lb \$10.00, 100 lb \$45.00.

White Clover

Excellent for use on the lawn, as it forms a close herbage and remains green throughout the season.

1/2 lb 70 cts., lb \$1.30 10 lb \$12.50, 100 lb \$110.00.
Oz. 15 cts.

PURE COW MANURE

The Difference Between WOODGRO and Other Fertilizers

The average organic fertilizer consists of dehydrated manures, which are more or less impure and contain large volumes of **useless filler**. WOODGRO, being pure cow-manure, concentrated is fertilizer of the highest value, which stimulates plant-growth, and also adds humus to the soil.

5 lbs. 40 cts., 25 lbs. \$1.25, 50 lbs. \$2.25,
100 lbs. \$4.25, 500 lbs. \$20.00, 1,000 lbs.
\$37.50, 1 ton \$70.00

If you once use WOODGRO and experience the wonderful results it gives, you'll use it always

WOODGRO FLOWER SEEDS

The bright blooming Annuals are the quickest and easiest of all flowers to raise. As their name indicates, they pass their entire existence within the compass of one year. The seed which you sow now germinates in a few days, produces plants which come into bloom, bear seed, and die before the approach of winter. Because of their short period of growth and their showy brilliance, they are extremely useful as fillers in gardens of bulbs, shrubs, or perennials, and also excellent for cutting.

Some Annuals are so hardy that their seed lives in the ground over winter and comes up year after year, so that they seem to be really perennials. The seed of other Annuals is tender and will not live outdoors over winter. These must be sown indoors early in spring and the little plants transferred to the open ground when the weather is warm.

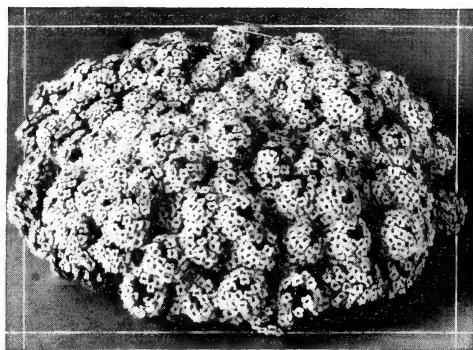

Practically all Annuals will bloom the first year if sown outdoors after the winter is settled, but some of them come into bloom a little late and so are better started in coldframes, hotbeds, or boxes indoors.

Almost all Annuals like rich soil, plenty of water, and bright sunshine. Dwarf varieties should be thinned to stand about 4 inches apart; taller varieties from 6 to 18 inches. Exceptional plants, like Cosmos, may require even more space.

Thorough cultivation while the plants are young and copious watering in dry weather will insure success.

Ageratum Blue Cap

Alyssum White Carpet

ACROCLINIUM

A hardy annual with pretty everlasting flowers; fine for winter bouquets. 1 ft.

GIANT DOUBLE FLYBIRDS, Mixed Colors.

Pkt. 20 cts., $\frac{1}{4}$ oz. 75 cts.

AGERATUM—FLOSS FLOWER

One of the very best bedding plants, being literally a sheet of bloom from early summer till frost. Unlike many bedding plants, these flowers are not likely to be spoiled by rain, nor do the colors fade out. Easily raised from seed, which is usually started in a hotbed or window and transferred to the open ground in May. Can also be sown outdoors in May.

BLUE CAP—Large, deep blue flowers 4 inches high.

Pkt. 15 cts., $\frac{1}{4}$ oz. \$1.00, $\frac{1}{4}$ oz. \$1.50.

WOODGRO

SELECTED ASTERS

The main essentials in growing fine Asters are a new, rich soil, frequent cultivation, no check to their growth from start to finish, and ample room to develop. When long-stemmed flowers are wanted for cutting, the plants should be set out not closer than 1 foot apart in the rows and 2 feet between the rows. When wanted for mass effect in beds, they may be planted 9 to 12 inches apart each way. They should not be grown on the same ground year after year; it must be changed each season.

Asters are sometimes attacked by an aphid at their roots; also by stem-rot. To prevent this, treat your seeds with Semesan before planting; also give the soil a liberal dressing of tobacco dust.

EARLY WONDER— $1\frac{1}{2}$ ft. This is the best extra-early Aster. If sown indoors in March, can be had in blossom before the close of June. Sown in the open the end of April, will blossom early in July. Flowers quite double, of good size, are borne on long, stiff stems which makes them of great value for cutting.

Pkt. 10 cts., $\frac{1}{4}$ oz. 30 cts.

NASTURTIUM

Tropaeolum

Few plants reward the grower more liberally with beauty and downright pleasure than common Nasturtiums. Their fragrant flowers are most freely produced and have many merits for cutting. Two very distinct types exist—the Tall or Running varieties which are excellent for scrambling over stone-piles, brush-piles, and trellises, and the Compact or Dwarf Nasturtiums which cannot be excelled for bedding and edging. For best results, Nasturtiums should be grown in rather poor soil in a sunny situation.

Semi-Dwarf or Gleam Types

GOLDEN GLEAM—Fragrant, double, gleaming gold blossoms.

SALMON GLEAM—Delicate salmon.

SCARLET GLEAM—Fiery, brilliant red.

DOUBLE GLORIOUS GLEAM HYBRIDS—

NEMESIA

A very beautiful, quick-growing, early-blooming annual, both for bedding and cool greenhouse culture. Nemesis are closely related to snapdragons and produce a very brilliant display in the garden over a long period.

Pkt. 15 cts., 4 pkts. 50 cts.

NEMOPHILA—Love-Grove

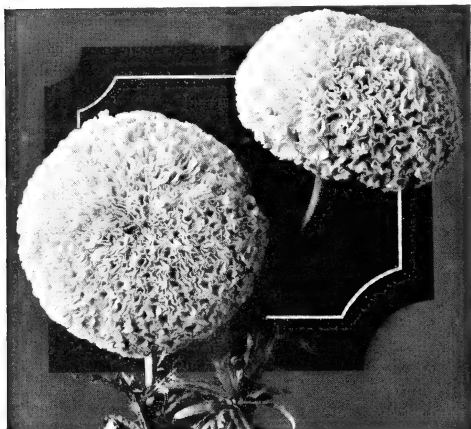

Charming, quickly-growing annuals of rosette-like habit, with inch-wide flowers in delicate colors on stems less than a foot high.

MIXED. Blue, Lavender, and White.

Pkt. 10 cts., $\frac{1}{4}$ oz. 50 cts.

WOODGRO MARIGOLDS

Marigolds afford a wealth of color that is simply invaluable. They are at their best when many other plants are past their prime. The African varieties are large-flowered, with long stems; the French are good for edging; and all of them are very effective, especially in an old-fashioned flower garden. Seed can be sown in May where the plants are to grow, or seedlings may be raised in hotbeds and transplanted outdoors the beginning of May.

Marigold Orange Ball

(Carnation Flowered)

This is the earliest of all African type Marigolds. Exceptionally free flowering, the color ranging from bright orange to clear lemon. It grows to a height of 18 inches with many base branches and laterals, all blooming at the same time, producing a mass of color that completely smothers the foliage. The blooms are from 2½ to 3 inches in diameter.

Pkt. 15 cts., ¼ oz. \$.60.

CHRYSANTHEMUM-FLOWERED — The blooms measure 2 to 4 inches in diameter. They are borne on stout plants 3 feet high. Contains many shades of yellow and orange. Pkt. 15 cts., ¼ oz. 50 cts.

COLLARETTE, CROWN OF GOLD—A Marigold with a chrysanthemum-like top or crown surrounded by a collar of big, broad petals of the same color—bright golden orange—with odorless foliage. Pkt. 10 cts., ¼ oz. 35 cts.

GUINEA GOLD—Pyramidal plants 2 to 2½ feet tall, literally covered with loosely double flowers of a brilliant shade of orange-gold. Blooming continuously from mid-summer until frost, it makes a wonderful garden show, and, having very little of the pungent Marigold odor, it is a splendid cut-flower. Pkt. 10 cts., ¼ oz. 35 cts., oz. \$1.00.

YELLOW SUPREME—Pyramidal plants 2 to 2½ feet tall, much like Guinea Gold. Blooms continuously from midsummer until frost. A pleasing shade of creamy lemon-yellow.

Pkt. 10 cts., ¼ oz. 40 cts., oz. \$1.25.

Double African Varieties

GIANT ORANGE BALL—2½ ft. Enormous, deep golden orange flowers of perfect shape.

PANSIES

Pansies grow best in cool, moist, partially shaded locations. For early spring flowers, the seed should be sown in August and the plants wintered over in a frame or in a sheltered nursery. Seed sown in early spring will produce good plants for autumn bloom.

WOODGRO SUPERB MIXTURE—Plants are compact and bushy, with long, deep roots which carry them through drought and heat. The giant flowers, of every conceivable color, are held on erect, rigid stems. A superb strain.

Pkt. 50 cts., 3 pkts. \$1.25.

BEDDING MIXTURE.

Pkt. 10 cts., ¼ oz. 60 cts., ¼ oz. \$1.00.

PETUNIAS

These prolific annuals lend themselves to many uses. Massed in beds, they make a sea of color. For window boxes or borders, they are unequalled. Profuse bloom is continued all summer and the first frost still finds them gallantly holding their own.

BETSY ROSS—The color of Betsy Ross is red and white, with the white blending to golden and the red blending to very deep red in the throat. The blooms are 2½ inches in diameter and well ruffled with a good open throat.

Pkt. 25 cts., 5 pkts. \$1.00.

CELESTIAL ROSE—A new improved shade of deep rose-pink. Compact plants make it a fine bedding variety.

Pkt. 15 cts., 5 pkts. 60 cts.

DWARF ELK'S PRIDE—A really dwarf type in which the straggly habit is entirely lacking, the plants being upright and free flowering. Color is royal purple.

Pkt. 25 cts., 5 pkts. \$1.00.

FLAMING VELVET—Rich velvety wine-red. Grows 1 to 1½ feet high with very few off-color flowers.

Pkt. 25 cts., 3 pkts 60 cts.

SALMON SUPREME—Dwarf bedding Petunia, with light salmon flowers, white throated. Plants are bushy, 12 in ches high, and bloom profusely over a long season.

Pkt. 25 cts., 5 pkts. \$1.00.

BEGONIAS, TUBEROUS-ROOTED

For window- or porch-boxes, beds or borders in semi-shaded positions, Tuberous-rooted Begonias are unexcelled for summer display, while well-grown examples in pots never fail to excite admiration.

The enormous single, frilled or double flowers are held well above the foliage, displaying a rich color-range from scarlet to white, through shades of yellow, orange, and pink. Start the bulbs indoors and put outdoors when the ground is warm. Extra large tubers.

HARDY GARDEN LILIES

HENRY I—Rare and beautiful Lily from the mountains of China. The flower stalks, 3 to 5 feet high, carry five to eight flowers each. In color it is a rich apricot-yellow, lightly spotted with brown.

Mammoth bulbs, 45 cts. each, \$4.50 dozen.

REGALE—The flowers are white, shading to yellow in the center, with a pink tinge in the outer edges. A strong grower, some 3 to 4 feet high.

Monster bulbs, 45 cts. each, \$4.50 dozen.

SPECIOSUM RUBRUM—An enormous, white flower, suffused and spotted with crimson and pink. Blooms in August.

Mammoth bulbs, 60 cts. each, \$6.00 dozen.

WOODGRO GLADIOLUS

MONTBRETIAS

One of the brightest of our summer-flowering bulbs, and deserves to be planted extensively. They should be set out during April or May, 3 to 6 inches apart, in clumps of a dozen or more. Protect during winter with a heavy covering of leaves or litter. Miscellaneous colors. \$1.00 dozen, \$7.50 per 100.

TUBEROSE

DOUBLE PEARL EXCELSIOR—Summer-flowering bulbs producing tall spikes of fragrant, double, white flowers. Use rich loam and start in hotbed or in house during March or April, or outdoors when all danger from frost is past.

10 cts. each \$1.00 dozen, \$8.00 per 100.

Aristocrats of the Gladiolus Family

No other summer-flowering bulb has enjoyed more universal popularity, or has greater diversity of beauty. Our entire selection is established upon the basis of proved merit. You will not be disappointed by any of them. All our Gladiolus Bulbs have been chemically treated, as a protection against thrip, which has proved so disastrous in the past seasons.

CULTURE—Any good garden soil will grow Gladiolus well, provided they are planted in a sunny location. Bulbs should be planted 4 inches deep and at least 6 inches apart; frequent cultivation with a hoe or a weeder, around the base of the plant to prevent the soil from becoming hard and dry, is advisable. Water copiously.

FEEDING—Gladiolus are gross feeders, and we find Woodgro Cow Manure is the most result-producing food. Apply it between the rows after the foliage has made a good start, and repeat the application every two weeks until the buds show. From that time on liquid Woodgro Cow Manure, applied every other day, produces splendid results.
